Regional Science and Urban Economics (1987) 609–610. North-Holland

INDEX

Benson, Bruce L. and James C. Hartigan, Tariffs and location specific income redistribution 223
Berechman, Joseph, Cost structure and production technology in transit: An application to the Israeli bus transit sector 519
Borgers, Aloys and Harry Timmermans, Choice model specification, substitution and spatial structure effects: A simulation experiment 29
Czamanski, Daniel, The effect of location subsidies on corporate decisions 411
Dafermos, Stella and Anna Nagurney, Oligopolistic and competitive behavior of spatially separated markets 245
De Borger, Bruno, Composite commodities, housing characteristics and the Hicksian surplus measures of welfare change 475
de Palma, André, Jose Pedro Pontes and Jacques-François Thisse, Spatial competition under uniform delivered pricing 441
Dunn, R., P. Longley and N. Wrigley, Graphical procedures for identifying functional form in binary discrete choice models: A case study of revealed tenure choice 151
Fischer, Manfred M. and Peter Nijkamp, From static towards dynamic discrete choice modelling: A state of the art review 3
Fujita, Masahisa and Tony E. Smith, Existence of continuous residential land-use equilibria 549
Gabriel, Stuart A., Moshe Justman and Amnon Levy, Place-to-place migration in Israel: Estimates of a logistic model 595
Hands, D. Wade and Bruce D. Mann, Urban industrial tax subsidies: A non-cooperative equilibrium approach 179
Hanjoul, Pierre and Dominique Peeters, A facility location problem with clients' preference orderings 451
Hanjoul, Pierre and Jean-Claude Thill, Elements of planar analysis in spatial competition 423
Hansen, Eric R., Industrial location choice in Sao Paulo, Brazil: A nested logit model 89
Hartigan, J.C., *see* B.L. Benson 223
Hensher, David A. and Frank W. Milthorpe, Selectivity correction in discrete-continuous choice analysis: With empirical evidence for vehicle choice and use 123
Hwang, Hong and Chao-Cheng Mai, Industrial location and rising energy prices: A case of bilateral monopoly 255
Ioannides, Yannis M., Residential mobility and housing tenure choice 265
Justman, M., *see* S.A. Gabriel 595
Katz, Eliakim and Oded Stark, Migration, information and the costs and benefits of signalling 323
Kitamura, R., *see* K. Kondo 49
Kondo, Katsunao and Ryuichi Kitamura, Time–space constraints and the formation of trip chains 49
Krashinsky, Michael and William J. Milne, Housing prices in metropolitan Toronto: An empirical analysis 289
Ledent, J., *see* K.-L. Liaw 67
Levy, A., *see* S.A. Gabriel 595
Liaw, Kao-Lee and Jacques Ledent, Nested logit model and maximum quasi-likelihood method: A flexible methodology for analyzing interregional migration patterns 67
